

# How to change your Sound Output device if sound isn't working

It's possible to have multiple sound output devices (including monitors) and sound may not be working as intended. Please follow the instructions below for resetting your sound output device.

## Quick Version:

1. Select the Mac icon (in the top left corner)
2. Select System Preferences
3. Click on Sound
4. Make sure that the Output tab is selected
5. To set sound to come out of the Mac, select "Internal Speakers"
