

How do I download a Vidyo recording for use or editing offline?

Article Number: 125 | Last Updated: Mon, Apr 16, 2018 at 9:19 AM

Using the VidyoReplay system to record or webcast and record gives you a video recording. What if you need to trim that recording? What if you want to use that video in other contexts?

To download your video:

- 1) Go to the VidyoReplay archive page (http://vidyoreplay.computecanada.ca/replay/login.html?login_error=3)
- 2) Login using your normal Vidyo credentials
 - Login button is at the top right of the black bar at the top of the screen
- 3) Click on "My Videos"
- 4) Find the video you want to edit; click on the word "Download"
 - a new page will open up in your browser; wait while the download starts.
 - it can take a long time to start downloading, and it looks like nothing is happening. But the download is happening.
 - the downloaded video will be in your computer's Downloads folder.
- 5) Use a program like MPEG Video or similar to edit your video.
