

## What IP addresses and networks can access the SPSS license server?

Article Number: 722 | Last Updated: Thu, Jun 21, 2018 at 10:57 AM

This article lists all of the current known UBC and UBC-affiliated networks that have been granted or disallowed access to the SPSS license server. This list is reviewed against <https://it.ubc.ca/services/email-voice-internet/list-ubc-ip-addresses>.

The firewall in front of the SPSS license server is open on UDP port 5093 to the hosts in the following table. However, there may be other firewalls in the path blocking outgoing connections on UDP port 5093 - checking or modifying those firewalls is outside the scope of the SPSS license server service.
