

How to install and use FindMe Printing

Article Number: 971 | Last Updated: Mon, Apr 1, 2019 at 11:49 AM

Follow these instructions to use FindMe Printing at the UBC Okanagan Campus.

To streamline printing around campus, faculty and staff will now be able to print from their primary workstation, and release the print job at any IT supported faculty/staff Ricoh Multifunction Device. This is now possible with the addition of two new virtual printing queues.

Requirements:

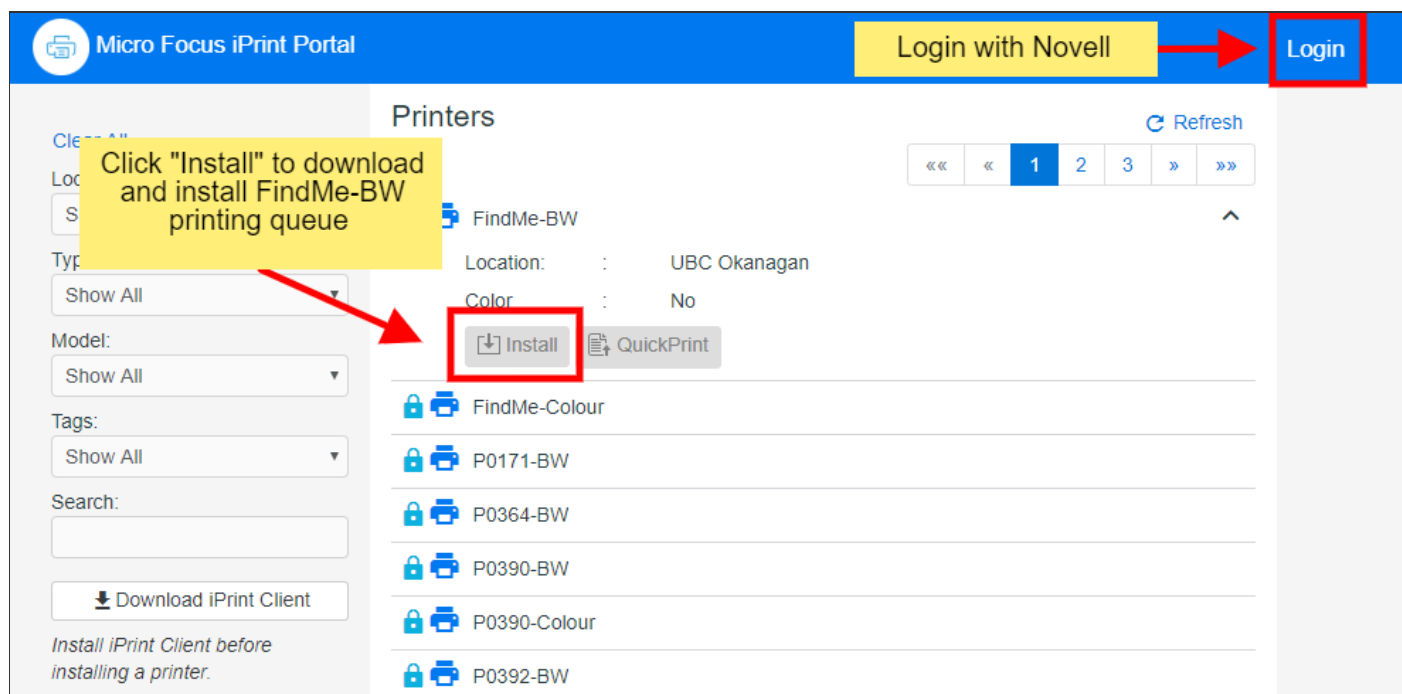

To use FindMe printing, you must be using a computer that has one of the following printers installed:

- FindMe-BW
- FindMe-Colour

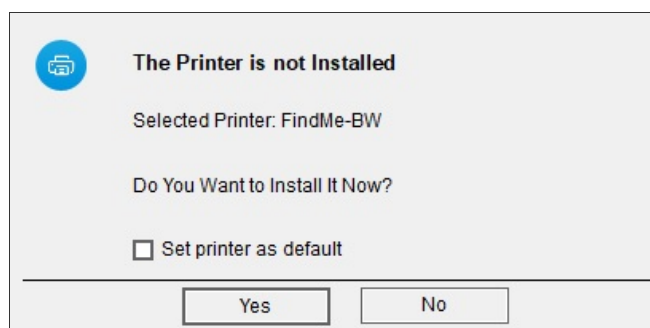

Instructions:

1. To download the FindMe-BW printing queue, go to <http://iprint.ok.ubc.ca> and click on "Employees".
2. [Login to the iPrint Portal](#) using your Novell username and password.
3. After login, click or hover on FindMe-BW to expand the options.
4. Click on "Install" to download and install the printer.
5. If the printer is not installed, you may see a prompt asking you to confirm the installation and a checkbox to set this as a default printer.

After downloading and installing the virtual printing queue(s), set the new printer as your default, or select it before printing. You will now be able to tap and release it at any supported Ricoh Multifunction Device.

The screenshot shows the Micro Focus iPrint Portal interface. At the top right, there is a yellow button labeled "Login with Novell" and a red-bordered button labeled "Login". Below this is a "Printers" section with a "Refresh" button and a pagination control showing page 1 of 3. The "Printers" list includes "FindMe-BW" (Location: UBC Okanagan, Color: No) and several other printers like "FindMe-Colour", "P0171-BW", "P0364-BW", "P0390-BW", "P0390-Colour", and "P0392-BW". The "Install" button for "FindMe-BW" is highlighted with a red box. A yellow callout box with a red arrow points to the "Install" button, containing the text: "Click 'Install' to download and install FindMe-BW printing queue". On the left side, there are filters for "Type", "Model", "Tags", and "Search", along with a "Download iPrint Client" button and a note: "Install iPrint Client before installing a printer."

The dialog box is titled "The Printer is not Installed" and features a printer icon. It displays "Selected Printer: FindMe-BW" and asks "Do You Want to Install It Now?". There is a checkbox labeled "Set printer as default" which is currently unchecked. At the bottom, there are two buttons: "Yes" and "No".

For more information or assistance, please contact the [ITServices Helpdesk](#) - 250.807.9000 or 855.807.9001.
